Newsletter of the National Association of Scale Aeromodelers (NASA)

PRESIDENT'S NOTES

Toledo 2003 NASA's Participation – April 4th -6th

NASA officers and members will again attend the Toledo Trade Show and man the booth in the same spot we've been for several years now. We look forward to seeing as many NASA members as possible and new products for scale modelers. Hope to see some new kits and we're sure there will be plenty of ARF's as they seem to be everywhere.

We will also have current membership lists, so if your not sure that you've renewed this year you can pay our Secretary Treasurer Bonnie Rediske your current dues. There is a lot of good information at Toledo for scale modelers too. So be there and don't miss it.

NASA's Scale Road Show

Again this year NASA will participate in one of the best seminars at Toledo. Some of the best scale modelers in the country will contribute their time and expertise to anyone who wants to listen, learn, ask questions and become better at what they do. I don't know anyone who knows it all yet, certainly not me.

Ed Clayman, NASA's Webmaster will host the Scale Road Show and has gathered a great talent pool for the two days when we will participate. Ed's been busy lately with his business and we really appreciate his efforts to gather the talent and commitment from so many scale modelers. So don't miss it if you can get to Toledo. Hope it doesn't snow again! We've all seen enough snow for one year.

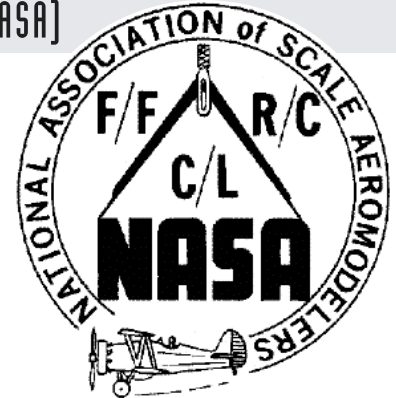

FAI Scale F4C - A Masters Qualifier

This year will mark the first time that any contest which holds a Scale Masters Qualifier and the FAI F4C class within that contest, the F4C will be considered a Qualifier for the Masters in Dayton this fall. So what this does is to give those who want to participate in the Team Selection- another chance to compete in the F4C class and qualify for the Masters at the same time. It appears to be a win/win for everyone. If a scale contest near you doesn't offer the F4C class, ask them to hold it! If they need technical help either Steve Sauger or any NASA officer will be glad to assist.

We received the word from the Masters Association about two weeks ago as I write this in mid-February. Thanks to Earl Aune and their Board for their promotion of the event.

We know this is only the start for F4C this year, but we hope to add many more scale contests next year also.

Mint Julep

The Mint Julep will offer the F4C class this year May 16th-18th at the Falls of Rough State Park in Kentucky. That's a start! We hope to add more F4C classes across the country this year and especially next year at Masters Qualifiers and other scale contests. NASA will sponsor trophies for the first 3 places for the F4C class at the Mint Julep. I look forward to seeing Dale Arvin or John Guenther giving away the trophies with some good-natured humor, which is customary at the Mint, so don't miss it.

Want to fly more than one or two airplanes over the weekend? Thought you would, the Mint Julep offers Fun Scale Novice as well as Fun Scale Expert as well as all of the other AMA classes. So double your fun!

For more information on the Mint Julep please contact:

John Guenther
21609 Borden-Greenville Rd., Borden, IN 47106
812-967-2814 – jmaguenther@yahoo.com

Dale Arvin
3428 Jeff-Charlestown, Jeffersonville, IN 47130
812-284-0162 – darvin8094@aol.com

After the Mint Julep we hope to receive a full newsletter's worth of reports on the event from Dale. Hey Dale, is that a hint or what?!

The Scale National Championships – June 27th - 29th

Please mark those dates! The last weekend in June will be the correct dates for 2003 and 2004. After the Scale Nationals in 2004 AMA will host the FAI Control Line World Championships, which will be one of the largest Championships of any model type. I'm sure they will be flying from sun up to sun down to complete all of the flights.

The Horizon Center was thought to be available by the Competition Department, but another group had put a contract for the center last July for the dates we needed it. All of this came to light from the Competition Department the end of last month. Steve Kaluf has been working to secure another site for static judging on the 27th.

The loss of the Horizon Center will force us to have to cancel the RC Indoor Fun event on Friday night. We all really hate that. The Horizon Center has been reserved for 2004 and we plan to hold the indoor event again that year. Our thanks to Mike Gretz for offering to hold the event this year! Due to the CL World Championships being held in 2004 the dates moved the Scale Nationals to the last weekend in June this year, otherwise we would have been right next to the July 4th holiday again this year, which in the past has proven to be a pain to everyone.

The Horizon Center was booked last July for June 27th by another group, so the Competition Department didn't really have a chance to get that venue one way or the other. Static judging will take place at Wilson Middle School. Maps will be available at the Nationals headquarters office and at the Signature Inn.

FAI Team Selection

The FAI Team Selection will be held at the Nationals. Want to enter F4C or F4B? and not enter the Team selection, that's ok. But it's still the same class, you just select not to go to the World Championships in 2004. Why do it this way? Well the old KISS principle comes to mind. In 2001 it was very confusing for the tabulation personal (you never want to tick them off) as they do an incredible task for everyone. It's even more confusing when you try to list two events as the same at Nats Headquarters. So, this seemed the simplest way to handle the F4C and F4B. The FAI Executive Committee, the AMA Competition Department, F4 Scale Selection Committee as well as the NASA officers all agree on this one.

New CL Site!!!

As stated before, the Executive Council has approved the plan to construct a 200x400 paved area to the north of the L Pad where C/L Scale will be flown in 2003 and there after as long as everything works out well. This area is out close to the two lane road parallel with the main entrance of the National Flying Site. We will have a larger flying pattern to work with for the future Scale R/C Nationals and the C/L Scale modelers will have nice new asphalt to fly off of without having RC models buzz their area.

These two circles will also add the needed circles for the 2004 C/L World Championships for AMA. Remember this is a multi-purpose site and I do mean the entire Muncie AMA National Flying Site. This has been an ongoing project for NASA officers and the AMA Competition Department for about 2 years now. Our Thanks to the AMA Executive Council for their wise decision and help in making this happen for everyone- including SCALE. Special Thanks to AMA V.P. and NASA member Charlie Bauer, as well as AMA Technical Director Steve Kaluf, and AMA President Dave Brown.

Uhhhh, now if the snow will just melt so they can begin construction, weather is the only thing that stands in the way of construction now.

RC-Indoor Scale Competition

This is the largest growing area in aeromodeling at this time. There is a huge potential for the expansion of this area (RC Indoor) and scale models like the ones from SIG Mfg. Inc. are one of the reasons. I've purchased one of the Antoinette kits, while I haven't began on the model, I can't wait to start. Just have to clear a couple of other projects off of the workbench first.

We will quickly see the models progress, from the WWI and vintage aircraft to civil as well as military models with flaps, retracts etc. The only limits seen at this time are batteries which now are much smaller and lighter and our imaginations. Many of the old free flight plans you might have in a box or tube can be easily adapted for these models. Flying sites are sometimes expensive.

Treasurer's Report -

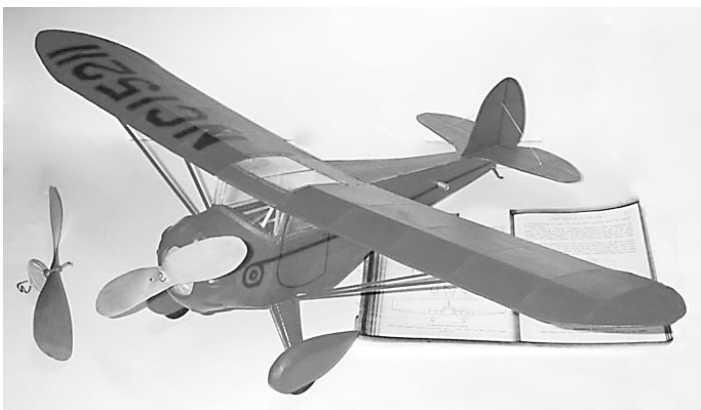

Checking \$1,161.72
Savings \$1,511.31

Expenses for 2002 included the newsletter, postage, Nationals, supplies. We are slowly building up a little extra money in the bank even with a loss of \$335 at the Nationals this past year. Entries were down some, but the event expenses were the same. Even raffle ticket sales, that in the past have contributed to keeping us in the black didn't fill the void this past year.

It costs approximately \$360 to put out a newsletter every other month. Our thanks to Ellis Kaster who works for everyone in NASA to make sure they receive their newsletters. Our Hats are off Ellis, Thanks so much.

Stan Alexander

Scale Scrapbook

Mike Welshans' rubber powered Megow Lambert Monocoupe has a 30" wingspan, weighs 62 grams and was built for the Free Flight Scale Mass Launch Event.

FAI Update

The official 2003 AMA entry form lists events #510 F4B CL Scale, and #516 F4C FAI Scale. These are the only FAI events that will be run at the NATS. Those FAI entries, interested in entering the Scale Team Program can indicate their desire at registration, Friday morning June 27, 03'. The top three entries in the Team Selection program in F4B and F4C will represent the U.S, in Poland in 2004.

The entry fee will be \$60, if just a sole entry. However, since Designer and Expert class models are encouraged to enter the Team Selection Program, the fee would be \$25, since it would be your second event.

Static judging for F4B and F4C will take place in front of the same set of judges. There will be two judges for outline and two for craftsmanship. As of this writing, the Horizon Center will not be available, and a new site is yet to be determined.

There will be four rounds of flying offered in both F4B and F4C. Final score will be the total of static plus the average of the best two flight scores.

The 12kg limit (26.4 lbs.) for F4C and 6kg (13.2 lbs.) single, 7kg (15.4 lbs.) multi. for F4B will still be in effect for 2004.

To be better prepared for world competition, it is hoped that we can expect constructive critiques from our static judges. And that should be true with the four judges that have been enlisted. George Buso and Mike Gretz will judge outline and Cliff Tacie and Dick Schneider will judge craftsmanship.

Stephen Sanger

Unofficial Events – 2003 The Scale National Championships

At this year's Nationals we have several unofficial events for ALL modelers. These include the following:

Three Free Flight Scale Events

Including: Kit –plan Scale Free Flight Mass Launch
Rubber Scale Free Flight
Power Scale Free Flight

These events will be flown before RC and CL events start each morning and after they end in the evening. These times offer the best air for FF Scale. Also if weather permits we will fly the Mass Launch Event during the Noon break at Show Center. Time will be made to allow anyone from the CL event to participate at the RC site.

C/L Scale

Team Scale *rules as per event #522 on page 169 regarding builder and pilot.

Fees:

For all of the above events, a \$5 entry fee for each event will be collected at the judging site during registration, where all static judging for ALL EVENTS (OFFICIAL & UNOFFICIAL) will be held on Friday.

Or you can send your entry fees FOR UNOFFICIAL EVENTS ONLY to NASA Secretary Treasurer Bonnie Rediske, 128 Darnley Dr., Moontownship, PA 15108 before June 15th. After that register at the static site

Friday Night Horizon Center-CANCELLED! Indoor RC Fun Scale cancelled due to the loss of the Horizon Center for this year only.

For more information about the Free Flight Scale Events, please contact: Dave Platt Event Director. 1306 Havre St. N.W., Palm Bay, FL 32907-8061 or contact Stan Alexander, 3709 Valley Ridge Dr. Nashville, TN 37211 Ph.615-834-1879 e-mail onawing@mindspring.com

For more information about the Scale CL Team Scale please contact: George Kite, 109 N. Denny St., Indianapolis, IN 46201 Ph. 317-356-4777 or e-mail at: georgekite@aol.com

77th National Aeromodeling Championships
2003
77 years of Nats
Johnson City TN • Muncie IN USA

Celebrating 100 years of powered flight

Unofficial Event Rules

Hosted by NASA and the Dave & Dave Show
June 27th-29th

Events:

Kit-plan Scale Free Flight Mass Launch

1. The model must be built from a commercial design in kit or plan form. Scaling to another size is permissible.
2. Model is to be rubber powered. No static judging. Flying to be Mass-Launch format, last 3 down are the winners. (Flying will be held during the _ time breaks for RC and CL scale events if weather allows.

Rubber Scale Free Flight

1. Static judging to 100 points as per RC, CL sport scale rules (documentation booklet required.)
2. Flying points- 1 point per second up to a max. of 100 points (1min. 40 sec.) 3 flights allowed, best single score counts.
3. The contestant's score will be the lower of the static or flying points.

Power Scale Free Flight

1. Model can be powered by anything except rubber. That is: Glo, Diesel, CO2, Electric, Jetex, etc.
2. Static as per Rubber Scale.
3. The model must then fly at least one flight of 1-min. duration. (3 attempts allowed) to qualify the model's static score. High score wins. If model does not make the minimum flight time, it has no score.

All static judging will be held in conjunction with Scale RC and CL at the Horizon Center on Friday June 27th at the Horizon Center.

These are unofficial events held by NASA and the Dave & Dave Show. Check-in is required at the Horizon Center on Friday June 27th. Entry Fee \$5 each event. Trophies to 3rd place.
